Pools for Every Backyard and Budget

You can create the backyard paradise you always dreamed about with a Cardinal Systems inground pool. By using quality steel in building our inground pools, we can shape and create anything you can imagine.

One of the most popular choices for inground pools is the vinyl liner method of construction.

Why a Vinyl Liner Pool?

The many advantages of vinyl liner make it one of the most popular choices for inground pools. With a great variety of liner designs, tile patterns, and colors, you can coordinate your pool's appearance with your backyard landscape.

The surface texture is smooth, non-slip, non-abrasive, and soft to the touch. It won't scratch the skin, swimwear, pool floats or toys, making it safer and more fun for the whole family.

Initial costs are typically less than that of other options and the construction method allows for speedy installation.

The liner's easy-to-clean surface saves time and energy maintaining your pool. The vinyl is non-porous and is treated to be resistant to algae, mold, mildew, and bacteria, requiring less chemical use and saving on annual upkeep and expenses.

Why a Cardinal Pool?

We realize our customers are making a big investment when they decide to install a backyard pool. We do our utmost to ensure that the end result is a beautiful and long-lasting swimming pool.

Your pool system is modular, meaning that each kit is comprised of different panels, which when bolted together give the builder and homeowner the desired shape and size, exactly to specifications.

Cardinal is the only manufacturer that uses total automation in the fabrication of our panels. Automation assures consistently high quality, precision alignment, and unmatched accuracy. They are made exactly the way the builder requires them, just before he needs them.

We work with you and your builder every step of the way. We'll help you design the pool that best fits your needs to maximize enjoyment and increase the property value of your home.

When you choose a Cardinal steel wall pool kit, you are buying the best pool available.

A Cardinal pool is, quite simply, built to last.
